ALL CONTENTS ARE ADAPTED TO
YOUR INDIVIDUAL
REQUIREMENTS AND NEEDS!

unimoc

Innovative, elegant, sophisticated: unimoc is a novel, unprecedented solution. The reason: the **uniquemedia-operationcontrol** unites all control systems in just one user interface for the first time.

Non-compatible software? Several separate operating units? These are now history. unimoc, however, is the present! TV, internet, radio or music – all media are controlled via unimoc. And this not only applies to entertainment electronics and communication technologies, even building technology is included, being visualised and operated via unimoc as well.

All applications are also connected via a network and operate on a synchronous basis, offering living comfort at its best: At a get-together in front of the TV, a pop-up window will appear on the TV screen and show the person ringing the door bell. Via remote control the door can then be opened – or not – from your sofa. Comfort meets safety! And with maximum flexibility – as TV shows, DVDs, music and slide shows aren't only displayed on your TV but also in parallel on all PCs and touch panels. With unimoc the future of living has begun.

unimoc's convincing performance through clever refinement. The touch panel shows the energy consumption, the current costs are visible at all times. The decision is made by the user himself.

+ IMPROVE YOUR QUALITY OF
LIFE, COMFORT AND SAFETY +

The simple intuitive user interface has a perfect graphic design. And the best thing: if technologies develop further and aspirations rise, the unimoc will grow as well – as the system can be extended individually without any constructional changes owing to its modular design.

ITS EASILY COMPREHENSIBLE
DESIGN AND CLEAR
STRUCTURE MEAN IT IS DEAD
EASY TO USE

APPLICATION EXAMPLES

UNIMOC IS CHARACTERISED BY:

A SINGLE USER INTERFACE FOR THE ENTIRE TECHNOLOGY IN YOUR HOME FOR THE FIRST TIME EVER
INTEGRATION OF ALL AVAILABLE TECHNOLOGIES

THE COMMON CONTROL OF COMMUNICATION TECHNOLOGIES, ENTERTAINMENT ELECTRONICS AND
BUILDING TECHNOLOGY

A SINGLE COMMON "LANGUAGE": IP

ALL APPLICATIONS ARE CONNECTED VIA A NETWORK AND OPERATE ON A SYNCHRONOUS BASIS

INTUITIVE USER INTERFACE WITH GRAPHIC DESIGN

HIGH OPERATIONAL COMFORT, SAFETY AND ENERGY EFFICIENCY

THE SYSTEM CAN BE EXTENDED INDIVIDUALLY OWING TO ITS MODULAR DESIGN

EXTENSION IS POSSIBLE WITHOUT ANY CONSTRUCTIONAL CHANGES

UNIMOC IS SELF-EXPLANATORY

INTERNET ACCESS AND CONNECTION VIA YOUR PC

→	THE ONE AND ONLY USER INTERFACE FOR ALL OF THE TECHNOLOGY IN YOUR HOME
→	HIGH OPERATIONAL COMFORT, SAFETY, ENERGY EFFICIENCY
→	INTEGRATION OF ALL AVAILABLE TECHNOLOGIES

EXPERIENCE LIVE

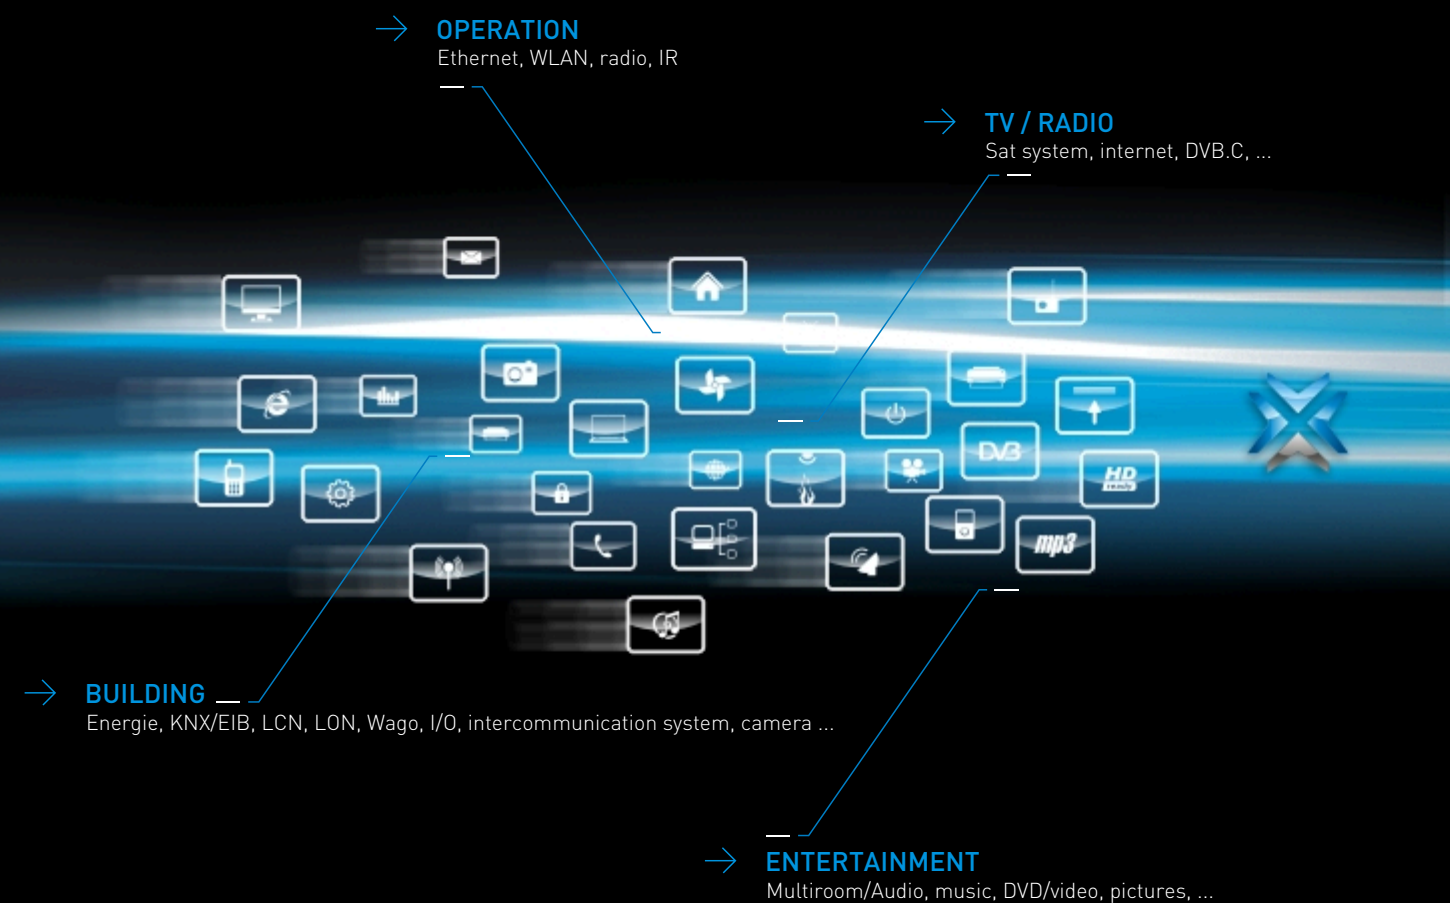

Control light conveniently, optimise the indoor climate, increase safety in your home, improve your comfort and at the same time lower your energy consumption – all this can be experienced live!

In our new showrooms we will show you how to control an intelligent home in a convenient way – using unimoc. Get to know a system without any limitation of your possibilities. We make modern living comfort a true experience for you. Make an appointment with us!

OUR LANGUAGE IS IP

unimoc is based on internet protocols – our language is IP. This is the basis for the fact that all technologies and formats are able to communicate with each other (mp2, mp3, wav, aac, wma, jpeg, bmf, gif, png, jpg – asf, avi, divx, mp4, mpeg, m2ts and many more). Whether it's TV, a camera, music, pictures or the internet - all the standard components of the IP world work with unimoc.

Netbook, notebook, nettop PC, desktop PC and touch panel each serve as clients.
